

THISAYURU ADIPTHA

Data Science Undergraduate | Aspiring Data Engineer | Data Analyst

Malabe, Sri Lanka | +94 77 675 7548 | thisayuruadiptha0529@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Data Science undergraduate at SLIIT (CGPA: 3.79) with hands-on experience building real-time data pipelines, ETL workflows, data warehouses, and machine learning models. Proficient in Python, SQL, R, Apache Kafka, AWS (EC2, S3, Glue, Athena), SSIS, SSAS, and Power BI, with a track record of delivering end-to-end data solutions and translating complex datasets into actionable business insights.

TECHNICAL SKILLS

- **Programming Languages:** Python | SQL | R
- **Data Engineering & Databases:** Data Warehousing | ETL | MySQL | Apache Kafka | SSIS | SSAS | OLAP
- **Data Analysis & Visualization:** Pandas | Power BI | Jupyter Notebook | Excel
- **Cloud Technologies:** AWS (EC2, S3, Glue, Athena)
- **Machine Learning:** Classification Models | Model Evaluation | Data Preprocessing | Statistical Analysis
- **Tools:** Git | GitHub | VS Code | MySQL Workbench | Power BI Desktop | Jupyter Notebook
-

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT), Malabe, Sri Lanka

BSc (Hons) in Data Science | September 2023 – Present (Expected Graduation: 2027) | CGPA: 3.79

G.C.E. Advanced Level — Commerce Stream 2022/2023

Results: 2A, 1B | Index No: 3055787

PROJECTS

Real-Time Stock Market Data Pipeline using Kafka & AWS

Python, Apache Kafka, AWS EC2, S3, Glue, Athena

- **GitHub:** [AdipthaDissanayake/stock-market-kafka-data-engineering](https://github.com/AdipthaDissanayake/stock-market-kafka-data-engineering)
- Architected an end-to-end real-time data pipeline using Apache Kafka and AWS services to ingest and process live stock market data.
- Built Kafka Producer and Consumer applications deployed on AWS EC2 to stream and process market data continuously.
- Persisted streaming data in AWS S3 and integrated AWS Glue and Athena to catalog the data and enable SQL-based querying without a managed database.

Online Food Delivery Data Warehouse & Analytics

SSIS, SSAS, SQL, Power BI, Excel, Business Intelligence

- **GitHub:** <https://github.com/AdipthaDissanayake/DW-BI.git>
- Designed and built a dimensional data warehouse for an online food delivery system, modeling fact and dimension tables to support analytical reporting.
- Built ETL pipelines in SQL Server Integration Services (SSIS) to extract, transform, and load data from source systems into the warehouse.
- Built OLAP cubes in SQL Server Analysis Services (SSAS) to enable fast, multidimensional business analysis.
- Developed interactive Power BI dashboards and Excel reports surfacing sales trends, customer behavior, and operational performance for business stakeholders.

Class Imbalance and Machine Learning Performance Analysis

R, Machine Learning, Statistical Analysis, Data Visualization

- **GitHub:** [AdipthaDissanayake/Impact-of-Class-Imbalance-on-ML-Model-Performance](https://github.com/AdipthaDissanayake/Impact-of-Class-Imbalance-on-ML-Model-Performance)
- Investigated how imbalanced class distributions affect machine learning classification performance through controlled experiments in R.
- Performed data preprocessing and exploratory data analysis, then trained and evaluated multiple classification models.

- Compared Accuracy, Precision, Recall, and F1-Score across different class distributions to identify which metrics best reflect true model performance under imbalance.

CERTIFICATIONS

- MongoDB Basics — MongoDB University
- Python for Beginners & Python Programming — University of Moratuwa
- What is Data Science? — IBM / Coursera (January 2026)

SOFT SKILLS

Problem Solving | Team Collaboration | Adaptability | Communication | Punctuality | Continuous Learning
